

## JAVASCRIPT :-

- 1 - What is ES6 and why it's introduced ?
- 2 - What is Promises ?
- 3 - What is CallBack ?
- 4 - Features that introduced in ES6 ?
- 5 - difference between Let , Var and Const ?
- 6 - What is Closures ?
- 7 - What is Event loop ?
- 8 - How do you push element at the first position of the array ?
- 9 - difference between arrow function and normal function ?
- 10 - Which is faster map or for loop JavaScript ?
- 11 - What is async and await ?
- 12 - what is filter ?
- 13 - what is reduce ?
- 14 - difference between null and Undefined ?
- 15 - Data types of javascript ? , What are Primitive data type ?
- 16 - what is Operators and How many Operators are in javascript ?
- 17 - difference between == Operator and === Operator ?
- 18 - Methods for sort a array ?
- 19 - Say some Array function methods ?
- 20 - Features of Javascript ?
- 21 - What is DOM ?
- 22 - What are events in Javascript ?
- 23 - What is Hoisting ?
- 24 - Difference between Settimeout and setInterval ?
- 25 - What is the use of isNaN function?
- 26 - What is 'this' keyword in JavaScript?
- 27 - Why JavaScript is called dynamically typed language?
- 28 - Write a simple function (less than 160 characters) that returns a boolean indicating whether or not a string is a palindrome.
- 29 - How do you add one at the end?
- 30 - What are two-way data binding and one-way data flow, and how are they different?
- 31 - What are undeclared and undefined variables?
- 32 - what is PWA in Javascript ?
- 33 - What is the significance of, and reason for, wrapping the entire content of a JavaScript source file in a function block?
- 34 - What is Functional Programming ?
- 35 - what is Throttling ?
- 36 - what is Debouncing ?
- 37 - what is Prototype in javascript ?

## REACT AND REDUX :-

## REACT :-

- 1 - What is React ?
- 2 - Advantages of React ?
- 3 - Difference between Reactjs and Angular ?
- 4 - what is flux in React ?
- 5 - What is PWA in React ?
- 6 - What is JSX ?
- 7 - Why we use pagination ?
- 8 - How to fetch API ?
- 9 - Different between Local Storage and session storage ?
- 10 - What is Lifecycle Method ?
- 11 - Different between Class and Functional component ?
- 12 - what is error boundary in react ?
- 13 - What are hooks ?
- 14 - What is State and How to update it ?
- 15 - difference between state and Props ?
- 16 - How does Reactjs virtual DOM Work ?
- 17 - What is Pure Component ?
- 18 - What is Higher Order Component ?
- 19 - what is props drilling ?
- 20 - Explain about React Router ?
- 21 - What is Component and Types of Component ?
- 22 - what is different between axios and Fetch ?
- 23 - What is useState hook and why we use that ?
- 24 - what is useEffect hook and Use of Its ?
- 25 - Difference between Stateless and Statefull ?
- 26 - What are Phase lifecycle method have ?
- 27 - Which Lifecycle method do you use for pure function ?
- 28 - What is One-way Data Binding how that is achieved?
- 29 - What is the significance of keys in React?
- 30 - What is the use of Refs?
- 31 - Why do we use render() in React?
- 32 - Limitation Of Reactjs ?
- 33 - Why is it necessary to start component names with a capital letter?
- 34 - What is Reusable Component ?

## REDUX :-

- 1 - What is Redux ?
- 2 - Principles of Redux ?
- 3 - Difference between Redux and Context API ?
- 4 - Difference between Redux and flux ?
- 5 - What is Action in Redux ?
- 6 - What is useDispatch and useSelector hook ?
- 7 - what is Store in Redux ?
